WORK EXPERIENCE

Verizon
Jun 2025 - Jul 2026

Senior Engineer Consultant - Tech Product Management — *Hyderabad, India*

- Designed and shipped a RAG system indexed on single-source-of-truth documentation that verifies ticket content before submission, eliminating invalid tickets at the point of creation rather than downstream in triage.
- Owned the AI ticket-quality and validation layer within an enterprise support program that reduced daily ticket volume from **~45,000 to 30,000**.
- Led product strategy and roadmap for extending a legacy ticketing platform with Agentic AI - AI-assisted triage, automated resolution recommendations, and intelligent workflow routing.
- Ran discovery on agent-customer interaction data to surface tool gaps and prioritize the highest-leverage AI automation opportunities.
- Established KPI frameworks for ticket deflection, invalid-ticket rate, resolution time, and CX outcomes.
- Partnered with AI Engineering, Data Science, Architecture, and Operations to deliver GenAI and Agentic AI initiatives end to end, owning backlog, prioritization, sprint planning, and release execution.
